

This is getting bad, I have had XM Radio for nearly 2 years and it much better than any of the commercial radio stations. I would wage that clear channel is the one behind this effort to limit us to have local traffic information available through XM Radio. I am a consumer and hopefully that I do not have to throw huge money at attorneys pretended to be lobbyists wining and dining everyone. This is not how government needs to be influenced. Remember the government is of the people and by the people and our elected officials seem to forget this . Thank you for your time

Roger
